

**A great look on the outside**  
starts with a great foam in the inside.

### Environmentally Friendly

We care about our planet and designed Ecoform to be eco-friendly.

### Regulatory Compliant

Rest easy knowing that Ecoform meets and exceeds all relevant regulations.

### No Phase Out

With its compliance, Ecoform is here to stay.

## Discover the difference Ecoform can make in your taxidermy projects.

Taxidermists require foam with pristine, grain-free surfaces and the durability to hold tacks and staples to create beautiful, lifelike mounts of all manner of wildlife. Ecoform™ is a high-density polyurethane foam solution for taxidermists, scientists, and wildlife artists. Ecoform aids in the creation of stunning, lifelike mounts that preserve the most precious memories.

### PFAS-FREE

PFAS-free products align with environmental stewardship and are an important aspect of responsible consumption and production practices.

### Sculptable

Easily scarfed, sanded, and cut, Ecoform is simple to work with.

### High Density

With a 3 lb. density, Ecoform allows tacks and staples to be added securely.

### Good Flowability

Ecoform captures every detail in your mold.
