

ecospray®

Proven Spray Foam Technology

Environmentally responsible polyurethane spray foam system.

From walls to ceilings and everywhere in between, **Ecospray®** from FSI offers the ideal choice in spray foams. No longer does environmental obligation mean compromising performance.

Ecospray® delivers the highest insulating performance and climate control without damaging the ozone layer or contributing to global warming. Ecospray® is US EPA SNAP compliant, HFC-free, and outperforms other closed cell spray foams. In addition to offering best-in-class thermal efficiency and air sealing security, Ecospray® provides enhanced structural integrity within the building envelope.

Climate Control:

- ✓ Industry Leading R-value
- ✓ Moisture Barrier
- ✓ Excellent Air Barrier

Other Advantages

- ✓ Enhanced Structural Integrity
- ✓ Sustainable Building Technology
- ✓ Unmatched Regulatory Compliance

fsi.co

ecospray® - beyond insulation.

Thermal Efficiency

With an R-value of 7.1 at 1" thickness, Ecospray® offers outstanding thermal conductivity, outperforming conventional insulation products like fiberglass.

Moisture Control

Ecospray® is 100% moisture impermeable, preventing risk of mold and mildew.

Environmentally Responsible

Ecospray® is environmentally benign, with zero ozone depletion potential, zero global warming potential, VOC-exempt status, and no end-of-life challenges.

Structural Enhancement

Ecospray® Reduces rack and shear and minimizes wall movements due to outside forces like wind, vibration, and occupant activity.

Air Flow Management

Ecospray® adheres to most construction surfaces and expands to form a seamless, airtight building envelope, creating a comfortable, energy efficient and healthy interior environment.

Sound Abatement

Ecospray® reduces unwanted noise and vibration (high and low), offering premium sound abatement by increasing airborne sound isolation, structural sound isolation and structural mass.

Full service technical support.

As a trusted spray foam supplier, we are dedicated to helping companies meet their objectives through the superiority of our polyurethane spray foam systems. Our team of expert chemists is always ready to work together with our customers to solve their toughest challenges.

Whether your goal is to improve product quality, lower costs, increase production efficiency, reduce environmental impact — or some combination of these or others — we are here to help. No matter where you are located, an FSI sales representative is nearby and ready to lend a hand. Connect with us.

RESPONSIBLE CARE®
OUR COMMITMENT TO SUSTAINABILITY
