

Improve your home's energy efficiency.

Therma Froth® low-pressure spray foam system.

Therma Froth® is a medium-density (2.0 pcf) low-pressure spray polyurethane foam (SPF) system delivered from disposable pressurized cylinder kits. Therma Froth® spray foam insulation is ideal for small jobs and patchwork applications for OEM use and is suitable for both professional and DIY use. The nominal 200- and 600-board-foot kits contain everything that is needed for use, including a **Polyshot™** applicator gun.

Therma Froth® applications.

Therma Froth® closed-cell spray foam is designed to improve the performance of the building envelope for residential (Type V) construction and to provide high thermal efficiency in industrial and OEM applications.

With an R-value of 7.7 at 1", Therma Froth® performs as an air and moisture vapor barrier. It's resistant to water, mold and insects. It expands into hard-to-reach areas and adds structural support to walls and roofs.

Pressurized delivery benefits:

- ✓ Greater thermal efficiency
- ✓ Air barrier
- ✓ Sound deadening
- ✓ Low-odor formulas

Benefits for spray foam contractors.

Increased sales – **Therma Froth®** foam systems are an easy way to start offering foam insulation if you don't already. It's a low-cost, low-maintenance, no-trouble way to bring added value to your services.

Satisfied customers – Our low-pressure foam system can make foam insulation accessible to customers who think it's too expensive.

Customer referrals – When your customers start noticing all the positive benefits of **Therma Froth®** foam insulation, you can bet they'll recommend it and your company to others.

Fewer callbacks – **Therma Froth®**'s rigid, closed-cell foam expands to fill and adheres completely where applied, so it's far less likely to develop problems down the road.

Increased profitability – Add up all the benefits, and it's easy to see how **Therma Froth®** can have a positive effect on your bottom line!

Uses and applications.

Residential construction and maintenance

Commercial construction and maintenance

Metal buildings

HVAC
