

# SLUG<sup>®</sup> PRO

PROFESSIONAL SERIES

**Advanced polyurethane foam dispensing equipment.**

Solventless, pressurized technology designed for precision and performance.

## **Optimized for your operations.**

**SLUG® Pro** (Solventless Urethane Gun) was the first polyurethane dispensing system engineered to enhance worker safety by eliminating the need for flushing solvents. This pressurized dispensing solution delivers controlled outputs from 6–60 lb/min. (3–27 kg/min.), making it well suited for pour-in-place applications requiring precision and repeatability. More than a foam dispensing gun, the SLUG Pro is designed to improve operational efficiency, streamline workflows, and deliver consistent, reliable performance in demanding production environments.

## Performs across a wide range of applications.

The **SLUG® Pro** is engineered to perform across a wide range of applications, making it a highly versatile asset to your operation. It is particularly effective in pour-in-place applications, delivering a dependable and efficient solution tailored to this specific need.

## American made.

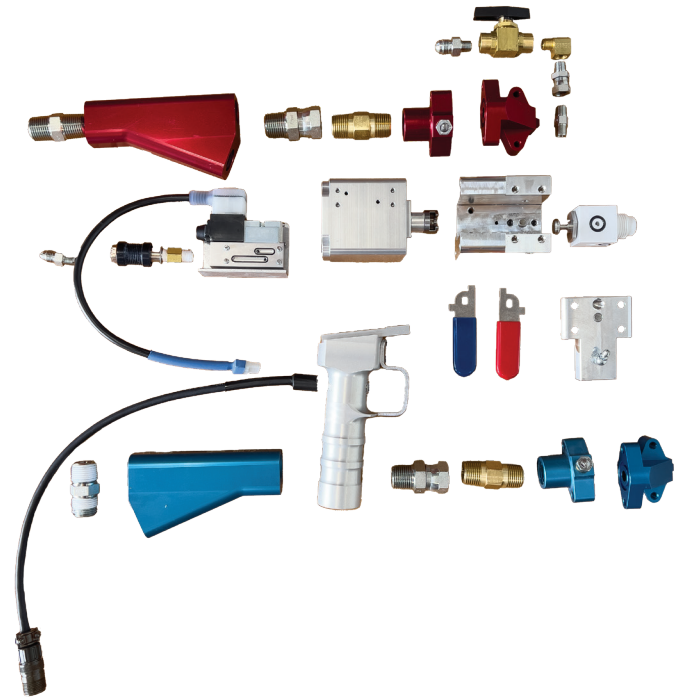

Proudly American made, the **SLUG® Pro** is produced at our global headquarters in Earth City, Missouri. Each unit is custom-built in-house by our technical service team to align with the specific requirements of the customer's application. This hands-on, application-driven approach ensures precise configuration, rigorous quality control, and dependable performance in the field.

## Made from premium grade materials.

The **SLUG® Pro** is built from high-performance materials selected for durability and long-term reliability. Core components utilize hardened aircraft aluminum, brass valve assemblies, and stainless steel braided hoses. The hoses are insulated and protected with a rugged ballistic nylon sheath to enhance longevity and wear resistance. The result is a robust polyurethane dispensing system engineered for structural integrity and consistent performance.

## Operator-focused design.

The **SLUG® Pro** is engineered with the operator in mind, prioritizing usability, handling, and service access. Unnecessary components have been eliminated to reduce complexity and improve day-to-day operation. Its streamlined configuration supports straightforward operation, maintenance, and repair, helping teams maintain productivity with minimal disruption.

## Quality production.

Each unit of the **SLUG® Pro** is personally assembled by our experienced technical service team to ensure compliance with our exacting standards. This approach allows us to focus on delivering quality products in a timely manner. Our equipment is not mass-produced—instead, it's a product of dedicated craftsmanship and commitment to quality.

---

## Customized for your application.

Every operation has unique process requirements. The **SLUG® Pro** can be configured to align with your specific material characteristics, output targets, and production parameters, ensuring seamless integration into your operation. Our team works closely with you to deliver a dispensing solution tailored to your application for optimal efficiency and long-term performance.

---

## Dedicated service and support.

Reliable production requires responsive support. Our team provides direct technical assistance, troubleshooting, and service to keep your **SLUG® Pro** operating efficiently and minimize downtime. This hands-on support helps maintain process consistency and extend the service life of your equipment.

## Training and instructional resources.

Our commitment to customer education, safety, and operational success extends beyond installation. We provide instructional resources, including detailed videos, to support the proper and safe use of both the SLUG® Pro and original SLUG systems.

## Primary applications.

Designed to support controlled polyurethane foam dispensing across a broad range of production and field applications.

- ✓ Composite Bonding & Reinforcement
- ✓ Cavity Filling
- ✓ Encapsulation
- ✓ Foam-in-Place Packaging
- ✓ Industrial Assembly
- ✓ Insulated Panel Production
- ✓ Marine Flotation Foam
- ✓ OEM Component Manufacturing
- ✓ Pour-in-Place Foam
- ✓ Structural Reinforcement
- ✓ Void Filling

## Key benefits.

- ✓ Low cost with industry-best ROI
- ✓ Time/cost-saving mix head rebuild
- ✓ Eliminates solvent disposal
- ✓ Supports single & multiple drops
- ✓ On-site technical support
- ✓ Disposable mix cartridge
- ✓ Light weight
- ✓ Line heating
- ✓ Various outputs:  
US: 6, 15, 30, 45, 60 lb/min.  
Metric: 3, 7, 14, 20, 27 kg/min.

## Standard features.

- ✓ Air open/air close cylinder
- ✓ Direct impingement mix
- ✓ Timer
- ✓ Cleaning & maintenance kit
- ✓ Digital ratio scale
- ✓ 25 ft. hoses (7.6m) & 45 ft. hoses (13.7m)

## Optional features.

- ✓ Gun mount timer
- ✓ Custom hose lengths
- ✓ Pipe system and manifold set-up

**Chemical Systems:** Premium off-the-shelf and custom-formulated systems for unique applications.

**Equipment:** Advanced dispensing equipment and turnkey solutions for complete processes.

**Technical Support:** Technical service team supporting consistent, uninterrupted production.

**Customer Service:** Steadfast dedication to delivering value for our partners.
